July 30, 2008 - Eric Wood to Chair Purfresh Scientific Advisory Board

Dr. Eric F. Wood has joined Purfresh' Scientific Advisory Board as Chairman. A well-respected and highly esteemed scientist, Dr. Wood will guide the company as it continues to develop science-based solutions for agriculture and water processing applications.

Dr. Wood is currently a professor with the Department of Civil and Environmental Engineering at Princeton University, and will retain his current position while acting as the Chairman of Purfresh's Scientific Advisory Board. As an internationally recognised hydrology and climate expert, Dr. Wood will also continue to serve as associate editor of the Water Resources Research journal, as Chair of the National Research Council's Committee on Hydrological Sciences and as a member of NOAA Climate Working Group, an advisory panel to NOAA's Climate Program Office.

At Purfresh, Dr. Wood will apply his hydrology and climate expertise in advising product development efforts and will continue to expand Purfresh's Scientific Advisory Board with industry experts.

Dr. Wood has published and lectured extensively around the world on water resources, hydrology and climate modeling, and the effect of hazardous waste on the environment. He has been recognised for his research through awards from the European Geosciences Union, the American Meteorological Society and the American Geophysical Union. Dr. Wood has been on the faculty at Princeton University since 1976. Dr. Wood holds a bachelor degree from the University of British Columbia and a doctoral degree in Civil Engineering from Massachusetts Institute of Technology (MIT) in Cambridge
