Purfresh moves from Livermore to Fremont

Purfresh Inc. moved to a new head office in Fremont.

The company, once named **Novazone Inc.**, was based in Livermore but needed room to grow. It also wanted to be closer to airports in Oakland and San Francisco.

David Cope is Purfresh's CEO and president. The company makes technology used to clean and purify food and water.

The new facility is west of Interstate 880 between Mission Boulevard and Dixon Landing Road. It is just south of the NUMMI auto plant.
